

# REINFORCEMENT HOMEWORK1

## Problem 4 (Policy Gradient Algorithms With Function Approximation)

A

- Learning Rate ( $lr$ ) = 0.001
- gamma=0.99
- scheduler optimizer = step:100, gamma:0.9
- 執行結果

## B

- Learning Rate ( $lr$ ) = 0.005
- gamma=0.99
- scheduler optimizer = step:400, gamma:0.9
- huber\_loss = delta =0.5
- 執行結果

## C

- Learning Rate ( $lr$ ) = 0.006
- gamma=0.99
- scheduler optimizer = step:400, gamma:0.9
- huber\_loss = delta =0.5
- 執行 2000 epoch，可是無法收斂。
